

The United States Commodity Index Fund® (USCI) is an exchange-traded product that seeks to track the performance of the SummerHaven Dynamic Commodity Index Total Return, less fund expenses. USCI is designed to be a convenient, cost-effective way for investors to access the returns of a portfolio of commodities futures contracts and is listed on the NYSE Arca.

The SummerHaven Dynamic Commodity Index Total ReturnSM (SDCITR) is an index designed to reflect the performance of a portfolio of 14 commodity futures. The index is reconstructed each month from 27 possible futures contracts. The 14 selected contracts are equally weighted and represent six sectors: Energy (WTI crude oil, Brent crude oil, natural gas, heating oil, gasoil, RBOB gasoline), Precious Metals (gold, silver, platinum), Industrial Metals (aluminum, copper, lead, nickel, tin, zinc), Grains (corn, soybeans, soybean meal, soybean oil, wheat), Livestock (live cattle, feeder cattle, lean hogs) and Softs (coffee, cocoa, cotton and sugar).

The SDCITR uses market price signals, including backwardation and 12 month price change, as part of its rules-based selection method. USCI is rebalanced monthly to reflect these changes to the index.

Fund Data as of 12/31/18

The Fund's net asset value per share ("NAV") is calculated by dividing the value of the Fund's total assets less total liabilities by the number of shares outstanding. Share Price returns are based on closing prices for the Fund and do not represent the returns an investor would receive if shares were traded at other times.

Growth of a \$10,000 Investment as of 12/31/18

This chart shows how a hypothetical investment of \$10,000 in the Fund at its inception would have performed versus an investment in the Fund's benchmark index. The values indicate what \$10,000 would have grown to over the time period indicated. The hypothetical example does not represent the returns of any particular investment.

Fund Benefits

- USCI has features including, intra-day pricing, and market, limit, and stop orders.
- USCI offers commodity exposure without using a commodity futures account.
- USCI provides Portfolio holdings, Market price, NAV and TNA on its website each day.

Important Considerations

United States Commodity Index Fund® (USCI) (“the Fund”), is not a mutual fund or any other type of Investment Company within the meaning of the Investment Company Act of 1940, as amended, and are not subject to regulation thereunder.

- Commodity and futures trading is highly speculative and generally volatile and are not suitable for all investors.
- The Fund is speculative and involves a high degree of risk. An investor may lose all or substantially all of an investment in the Fund.
- Please review the prospectus for the breakeven calculations for the Funds.
- Ordinary brokerage commissions apply.
- Shares of the Fund are not FDIC insured, may lose value and have no bank guarantee.
- Indexes are unmanaged and do not reflect the deduction of any fees, expenses or taxes; individuals cannot invest directly in an Index.
- Only authorized purchasers may purchase or sell directly with USCI, in minimum blocks of 50,000 shares.
- USCI’s share price may not closely track the SDCITR, the price of the futures contracts in the SDCITR, the spot prices of these commodities, or the NAV of USCI.

The Fund is not operated in a fashion such that its NAV will reflect the percentage change of the price of any particular futures contract as measured over a time period greater than one day. It is not the intent to operate the Fund in a fashion such that its NAV will equal, in dollar terms, the spot price of any particular futures contract.

K-1s will be available for tax reporting purposes. You may download them electronically through a link on the fund’s website.

Definitions

DBIQ Optimum Yield Diversified Commodity Index Total Return™ (DBLCDBCT) – a rules-based index composed of futures contracts on 14 of the most heavily traded physical commodities.

Bloomberg Commodity Index Total Return (BCOM TR) – is an index that tracks the performance of 22 broadly diversified commodity futures contracts. Prior to July 1, 2014, BCOM was known as the Dow Jones-UBS Commodity Index.

S&P Goldman Sachs Commodity Index Total Return® (SPGSCI TR) – is a composite index representing the unleveraged, long-only performance of a diversified group of commodity futures contracts. The returns are calculated on a fully collateralized basis with full reinvestment.

Rogers International Commodity Index® - (RICIGL TR) – is an index of 37 commodities futures contracts based on global consumption and liquidity.

Backwardation – describes a futures market where the prices of futures contracts, charted over a period of time, are downward sloping. As the contracts near expiration the prices tend to rise.

Contango – a market price condition where the price of the futures contract that is nearest to expiration is lower than the next contract’s price.

Correlation – a statistical measurement of how closely two securities have moved together.

CPI – the Consumer Price Index (CPI) is a weighted average of the price of a basket of goods, used to measure the cost of living and is an indicator of inflation.

Volatility – is a statistical measurement that refers to the amount of uncertainty or risk about the size of changes in a given security or market index.
