USCF SummerHaven SHPEI Index Fund

9.30.2018 Q3

The USCF SummerHaven SHPEI Index Fund ("BUY" or "Fund") employs a "passive management" or "indexing" investment approach designed to track the price and yield performance, before fees and expenses, of the SummerHaven Private Equity Strategy Index® ("SHPEI" or "Index"). The Index includes common stocks of micro-, small-, and mid-capitalization U.S. companies with market capitalizations of at least \$100 million and lower than \$10 billion at the time of the index construction. The market capitalization range of the Index may fluctuate between rebalancing periods. The companies comprising the Index are listed on U.S. stock exchanges.

The Index attempts to replicate the long-term (i.e., 10 years or more) return characteristics of diversified private equity allocations. The Index is designed to include publicly-traded companies that possess characteristics similar to the companies that private equity firms have historically selected for investment, as well as companies that SummerHaven Index Management, LLC (SHIM), as the index provider believes private equity firms are likely to select for investment in the future. **However, the Index does not include, and the Fund does not invest in, private equity funds or private equity of companies.**

The Index is constructed using a proprietary methodology that favors companies with low enterprise value to earnings before interest, taxes, depreciation, and amortization ("EV /EBITDA") ratios; low net equity issuance; low market capitalization; and moderate profitability. From a universe of approximately 3,000 U.S. companies, SHIM applies proprietary screens to determine an investable universe. The Index includes the greater of 200 companies or 20% of such investable universe. The Index is equally-weighted and rebalanced annually.

Under normal market conditions, the Fund generally invests substantially all, but at least 80%, of its total assets in the common stocks comprising the Index. The Fund generally invests in substantially all of the common stocks comprising the Index and in approximately the same proportions as the Index.
