

The United States 12 Month Natural Gas Fund[®] LP (UNL) is an exchange-traded security that is designed to track the movements of natural gas prices. UNL issues shares that may be purchased and sold on the NYSE Arca.

UNL's Objective – The investment objective is for the daily changes in percentage terms of its shares' net asset value ("NAV") to reflect the daily changes in percentage terms of the spot price of natural gas delivered at the Henry Hub, Louisiana, as measured by the changes in the average of the prices of 12 futures contracts on natural gas traded on the NYMEX, consisting of the near month contract to expire and the contracts for the following 11 months, for a total of 12 consecutive months' contracts, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire and the contracts for the following 11 consecutive months (the "Benchmark Futures Contracts"), less UNL's expenses. When calculating the daily movement of the average price of the 12 Benchmark Futures Contracts, each contract month is equally weighted.

UNL's Target – Natural gas is one of the most important physical commodities in the global economy. Natural gas futures are one of the most actively traded futures contracts and represent the primary US benchmark for natural gas.

UNL's Portfolio – The portfolio consists of listed natural gas futures contracts and other natural gas related futures contracts and may consist of forwards and swap contracts. These investments will be collateralized by cash, cash equivalents and US government obligations with remaining maturities of two years or less.

Fund Data as of 3/31/19

Ticker Symbol	UNL
Intra-day Indicative Ticker	UNL.IV
NAV	\$10.50
Shares Outstanding	450,000
Total Net Assets	\$4,723,038

Fund Benefits

- UNL has features including, intra-day pricing, and market, limit, and stop orders.
- UNL offers commodity exposure without using a commodity futures account.
- UNL provides portfolio holdings, market price, NAV and TNA on its website each day.

Fund Performance as of 3/31/19

	1 month	3 month	Year-to-Date	1 year	5 year	Since Inception Cumulative (11/18/2009)	Since Inception Annualized (11/18/2009)
UNL (NAV)	-3.49%	2.34%	2.34%	13.02%	-11.76%	-79.00%	-15.35%
Share Price	-3.45%	1.60%	1.60%	13.83%	-11.74%	-79.01%	-15.36%
Benchmark	-3.63%	2.01%	2.01%	11.85%	-11.72%	-78.11%	-14.98%

The performance quoted represents past performance, does not guarantee future results and current performance may be lower or higher than the data quoted.

The Fund's NAV is calculated by dividing the value of the Fund's total assets less total liabilities by the number of shares outstanding. Share Price returns are based on closing prices for the Fund and do not represent the returns an investor would receive if shares were traded at other times.

Growth of a \$10,000 Investment as of 3/31/19

This chart shows how a hypothetical investment of \$10,000 in the Fund at its inception would have performed versus an investment in the Fund's benchmark. The values indicate what \$10,000 would have grown to over the time period indicated. The hypothetical example does not represent the returns of any particular investment.

UNL seeks to manage its portfolio such that the average daily changes in its NAV over any rolling 30-day period is within 10% +/- of the average daily change in the price of the benchmark.

This investment is not suitable for all investors. Funds that focus on a single sector generally experience greater volatility.

Important Considerations

- **UNL® is not a mutual fund or any other type of Investment Company within the meaning of the Investment Company Act of 1940, as amended, and UNL is not subject to regulation thereunder.**
- **This investment is not suitable for all investors.**
- **Commodity trading is highly speculative. Commodity prices and futures generally are volatile and are not suitable for all investors. UNL is speculative and involves a high degree of risk. UNL is likely to be volatile and could suffer from periods of prolonged decline in value. An investor may lose all or substantially all of an investment in UNL. Funds that focus on a single sector generally experience greater volatility.**
- **The Fund is not operated in a fashion such that its NAV will reflect the percentage change of the price of any particular futures contract as measured over a time period greater than one day. It is not the intent to operate the Fund in a fashion such that its per share NAV will equal, in dollar terms, the spot price of any particular futures contract.**
- Trades in UNL through Schwab ETF OneSource are available without commissions when placed online in a Schwab account. An exchange processing fee applies to sell transactions. Certain types of Schwab ETF OneSource transactions are not eligible for the commission waiver, such as short sells and buys to cover (not including Schwab ETFs). All ETFs are subject to management fees and expenses.
- There is the risk that the daily changes in the price of UNL's shares on the NYSE Arca will not closely track the changes in the spot price of natural gas. This could happen if the price of shares traded on the NYSE Arca does not correlate closely with UNL's NAV; the changes in UNL's NAV do not closely correlate with the changes in the average of the prices of the Benchmark Futures Contracts; or the changes in the average of the prices of the Benchmark Futures Contracts do not closely correlate with the changes in the cash or spot price of natural gas. If these correlations do not exist, then investors may not be able to use UNL as a cost-effective way to invest indirectly in natural gas or as a hedge against the risk of loss in natural gas-related transactions.
- UNL could terminate at any time and cause the liquidation of your investment which may upset the overall maturity and timing of your investment portfolio. An unanticipated number of redemption requests during a short period of time could have an adverse effect on the NAV or UNL.
- UNL may not earn trading gains sufficient to compensate for the fees and expenses that it must pay, and as such, it may not earn any profit. You should not invest in UNL if you will need cash distributions from UNL to pay taxes on your share of income and gains of UNL, if any, or for any other reason.
- Shares of UNL may be purchased or sold throughout the day through any brokerage account which will result in typical brokerage commissions. Investors buy and sell shares in the secondary market (i.e., not directly from UNL). Only authorized purchasers may trade directly with UNL in minimum blocks of 50,000 shares.
- Trades in UNL through Schwab ETF OneSource are available without commissions when placed online in a Schwab account. An exchange processing fee applies to sell transactions. All ETFs are subject to management fees and expenses. Schwab ETF OneSource is a trademark of Charles Schwab & Co., Inc. Used with permission.
- K-1s will be available for tax reporting purposes. You may download them electronically through a link on each fund's website.
- ^ USCF has voluntarily agreed to pay certain expenses typically paid by UNL that exceeds 0.15% of NAV on an annualized basis. USCF may discontinue this arrangement at any time, which could negatively impact an investment in UNL.
